SUMMARY

I am a passionate software engineer and social entrepreneur. I am proud of my beginnings as a youth developer with inner-city kids then through education within the halls of congress and now in software engineering.

As a software engineer with a focus on React, Node.js and JavaScript, I've built a robust portfolio including a professional coffee cupping app. I've also built custom library projects in other languages such as Ruby that have been widely used by the developer community.

HIGHLIGHTED PROJECTS AND TECHNICAL SKILLS

Studio Ghibli's Fan Hub | [Demo](#) | [Github](#) | [Blog](#) |

- React app with eCommerce built-in using Stripe API for payment gateway. Implemented NoSQL Firebase for serverless storage. Styled Components patterns for UI, and used React Hooks.
- State management through Redux; enhanced by Redux Reselect, Redux Persist and Redux-Saga.

Catoro - Coffee Cupping app | [Catoro Demo](#) | [Github](#) | [Blog](#) |

- Implemented UI employing React / Redux with React-Bootstrap for styling. JSON Web Tokens through React Google Login and localStorage to store encrypted user information client-side. Rails API + PostgreSQL database.
- Utilized ES6+ JavaScript, React Hook-Form, Helmet for dynamic titles and data visualization through Chart.js.

Yijing Ball-Z - I Ching oracle inspired by Dragon Ball Z. | [Yijing-Ball Z Demo](#) | [Frontend](#) / [Backend](#) | [Blog](#) | [Blog2](#) |

- Vanilla JavaScript frontend and implemented Node.js/Express API server with MongoDB database and GraphQL querying for authenticating users. Handled AJAX CRUD calls in JSON.
- Authentication implemented with Facebook JS SDK, styling with W3.CSS. NPM packaging through Browserify.
